

VHX-51C

Dakota Digital VHX Instrument Installation
For 1951-52 Chevrolet Car

Your new VHX-51C kit includes:

Universal Sender Pack

VHX Displays

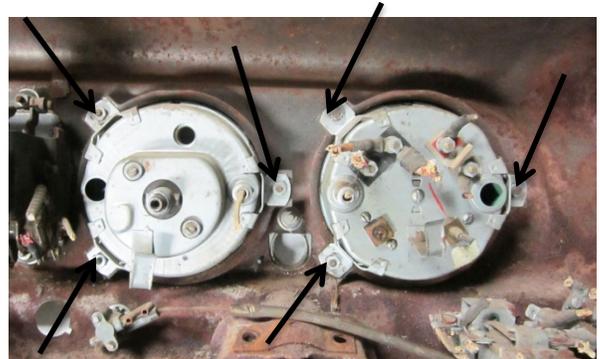

(2) CAT5 Cable

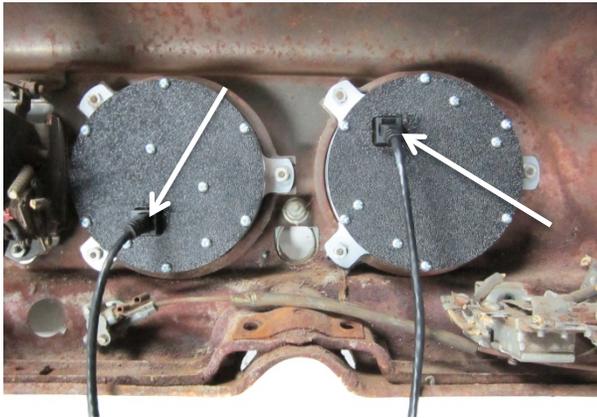

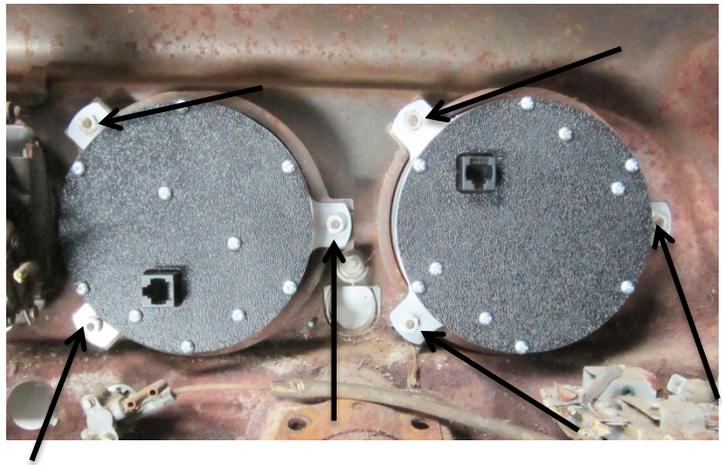

Control Box

Installation

1. Remove the stock gauges from the dash by removing the six (6) nuts from the backside of the dash and retain the hardware for reassembly.

2. The VHX system is a direct replacement of the original cluster, so use the three mounting studs for each gauge along with the factory hardware to secure the VHX system to the dash.

3. Connect a CAT5 cable to the back of each VHX gauges and take care when routing the other ends to the control box mounting location.

4. Refer to the main manual for wiring instructions to complete the VHX installation.
