Your new HDX-70D-CLG kit includes:

HDX Display

Universal Sender Pack

Switch Assembly

Buzzer

Installation Manuals

Main Harness

Clock Harness

(3) Indicator Harnesses

Control Box

Installation

1. Remove the stock plastic bezel from the dash. Retain all factory hardware for reassembly.

2. Remove the stock gauge cluster by removing the four (4) screws and retain the hardware for reassembly.

3. Mount the HDX system to the dash by reusing the four (4) screws that held the factory cluster.

- 4A. This system comes with two options for the turn signals and brake indicator. You can have the indicators located in the faceplate of your new HDX display, and/or arrows in your vehicle's stock locations. To use the new faceplate indicators, follow the wiring instructions found in the main HDX manual.

To optionally use the stock locations, do not wire to the HDX control box. Instead, use the provided two-wire harnesses. The harnesses plug directly into the connectors on the back side of your new HDX system:

WHITE\GREEN wire to INDICATOR CIRCUIT

WHITE\BLACK wire to CHASSIS GROUND

- 4B. Attach the provided main harness, clock harness, and buzzer (optional for audio feedback) to the back of the HDX system and carefully route the open ends to the control box mounting location.

5. Re-install the gauge bezel to the dash using the factory hardware and refer to the main manual for wiring instructions to complete the HDX installation.
