

VHX-1018

Dakota Digital Universal VHX Instrument Installation

Your new VHX-1018 kit includes:

VHX Display

Universal Sender Pack

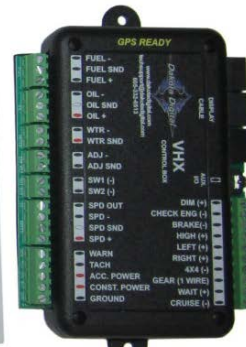

Switch Assembly

Installation Manuals and Cutout Template

CAT5 Cable

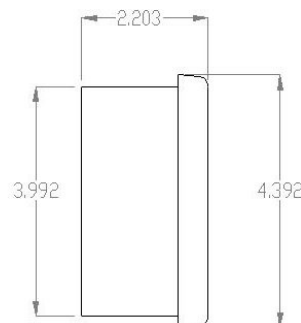

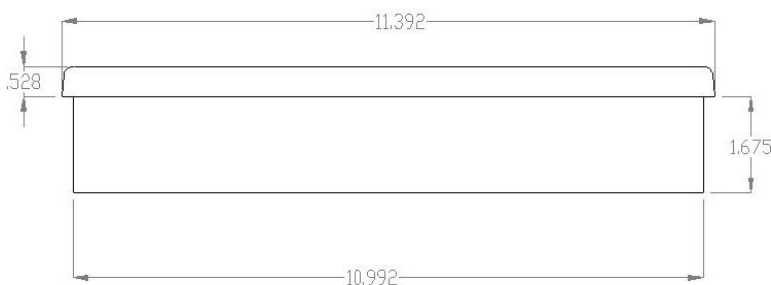

(4x) L-Brackets and Thumb Nuts

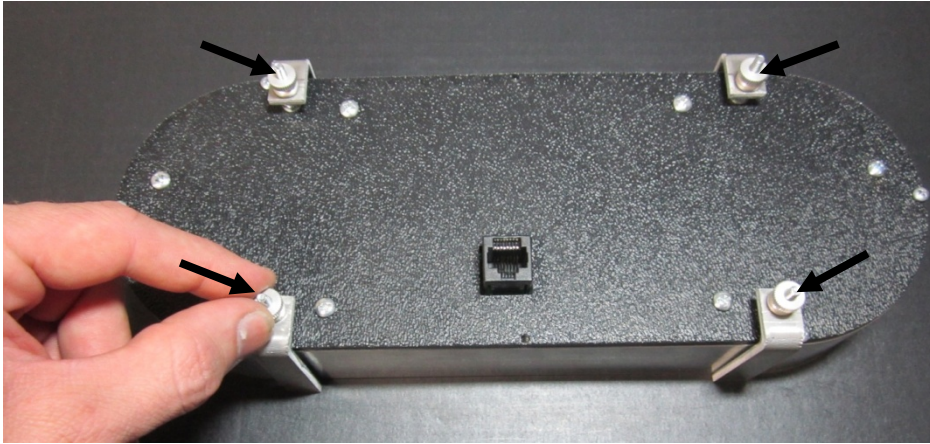

Control Box

Installation

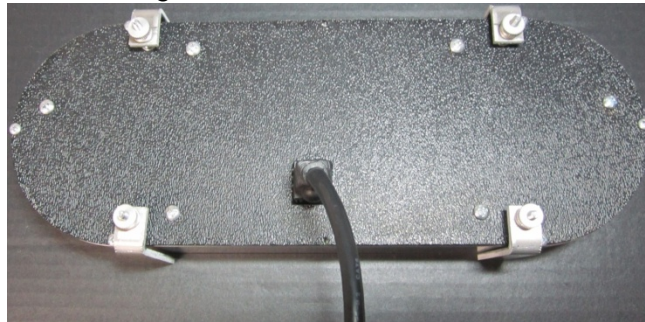

1. Use the provided template to mark out the opening needed to fit the VHX display. Ensure there is adequate clearance behind the desired mounting location. The display unit needs approximately two inches of depth behind the dash.

2. With the appropriate opening cut, place the VHX display into the dash and attach the four (4) L-brackets to the back of the display using the provided thumb nuts.

3. Attach the provided CAT5 Cable to the back of the VHX display and carefully route the other end to the control box mounting location. Remove the protective tape from the lens and refer to the main manual for wiring instructions.
