

## HDX-58C-IMP

Dakota Digital HDX Instrument Installation  
For 1958 Impala

Your new HDX-58C-IMP kit includes:

HDX Display

Block off Lens

Universal Sender  
Pack

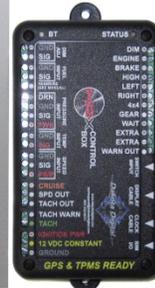

Buzzer

Installation Manuals

Main Harness

Control Box

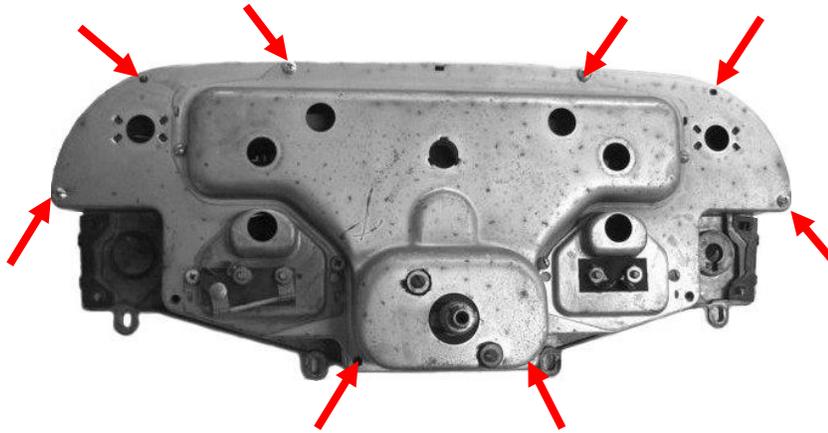

(8x) 8-32 x  
1/2" Screws

## Installation

1. Remove the stock gauge cluster from the dash.

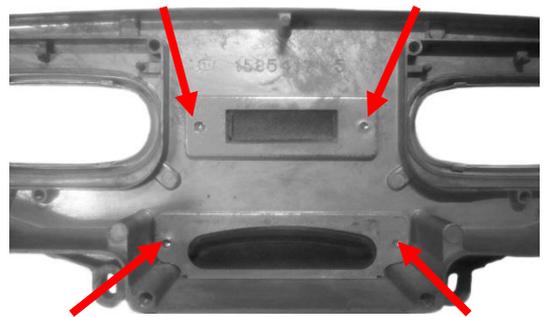

2. Remove the stock gauge housing from the bezel by removing the (8) eight screws on the rear of the metal housing. The only item to be reused is the original front bezel; the other pieces can be discarded. Now is a good time to clean or refinish the bezel.

3. Remove all lens and separator plates from the bezel. The odometer lens and gear indicator lens will need to be drilled out. You should be left with a bare bezel.

**Drill at these points**

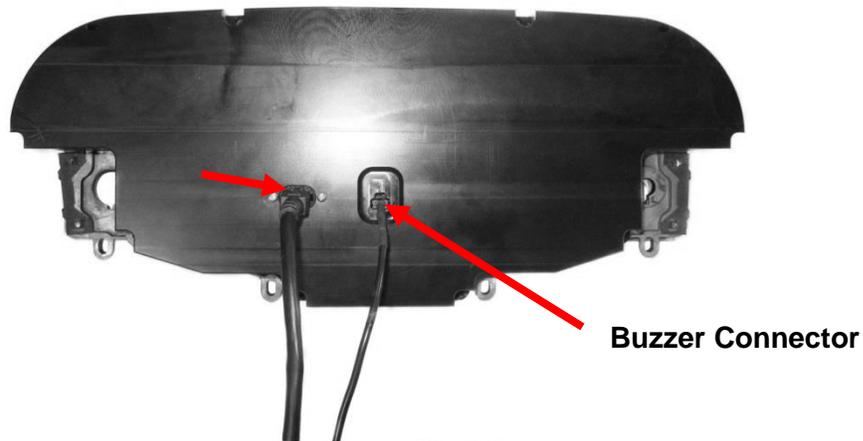

**Bare housing ready for HDX assembly**

- Secure the HDX system to the bezel by using the (8) eight supplied 1/2" screws. Watch carefully as you insert the system so you don't scratch or damage the lens or switch buttons.

- Connect the provided harness and the buzzer (optional for audio feedback) to the back of the HDX system.

- Re-install the cluster into the vehicle and refer to the main manual for wiring instructions to complete the HDX installation.

- Removing the stock gauge eliminates the illumination for the gear indicator during headlight. The supplied gear indicator block off lens can be used if so desired.

8. With the lower dash bezel already out, remove the two mounting screws to remove the indicator plate and lens.

9. Peel off the protective paper and lay the block off lens flat in the gear indicator opening. Use silicone to adhere the lens to the lower dash bezel.

10. Reassemble lower dash bezel when the silicone has cured.
