

# HDX-64C-CVL

Dakota Digital HDX Instrument Installation  
For 1964-'65 Chevelle, Malibu and El Camino

Your new HDX-64C-CVL kit includes:

HDX Display

Universal Sender Buzzer Pack

Installation Manuals

(4) 8-18 x 3/4"

Main Harness

Control Box

Blinker Harnesses (2)

## Installation

1. Remove the bezel from the dash.

2. Remove the stock gauge, and lens from the bezel. The only item to be reused is the original front bezel.

3. Secure the HDX system to the bare bezel using the supplied screws.

4. This system comes with the option to use two sets of turn signals in your dash: arrows located in the faceplate of your new HDX display, and arrows in your vehicle's stock turn signal locations. To use the new faceplate arrows, follow the wiring instructions for the turn signals found in the main HDX manual.

To optionally use the stock turn signal arrows, do not wire the turn signals to the HDX control box. Instead, use the two (2) provided two-wire harnesses. The harnesses plug directly into connectors on the back side of your new HDX system. Connect the wires from these harnesses to your turn signal circuits and ground as shown below. Doing this will light green LED bulbs, located in the original locations of your dash panel, when turn signals are active. Make sure to check left and right to verify they were wired correctly.

**Buzzer Connector**

5. Connect the provided Main Harness and the Buzzer (optional for audio feedback) to the back of the HDX system.

6. Re-install the cluster into the vehicle using the factory hardware and refer to the main manual for wiring instructions to complete the HDX installation.
