For 1951-52 Chevrolet Car

Your new RTX-51C kit includes:

RTX Displays

Universal
Sender Pack

Buzzer

Installation Manuals

Switch Assembly

36" Main Harness

Control Box

Interconnect Harness

Installation

1. Remove the stock gauges from the dash by removing the six (6) nuts from the backside of the dash and retain the hardware for reassembly.

2. The RTX system is a direct replacement of the original cluster, so use the three mounting studs for each gauge along with the factory hardware to secure the RTX system to the dash.

3. Connect both gauges using the provided interconnect harness. Also connect the buzzer (optional for audio feedback) to the back of the system. Connect the main harness to the interconnect harness and carefully route the other end back to the control box.

4. Refer to the main manual for wiring instructions to complete the RTX installation.
