Switch Assembly

(4) 8-18 x 3/4"

Blinker Harnesses (2)

Main Harness

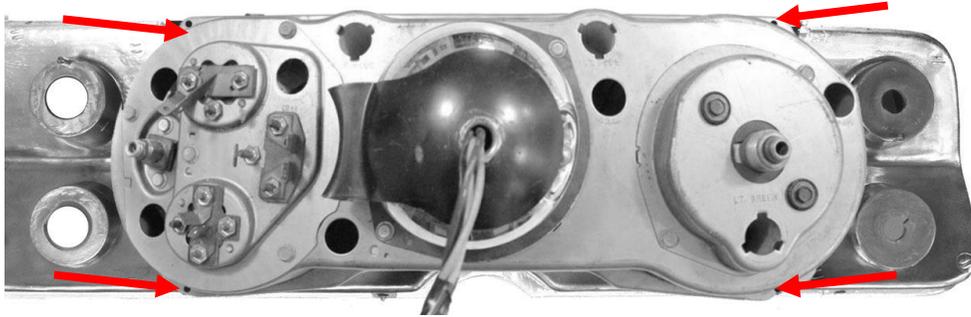

Control Box

Installation

1. Remove the bezel from the dash.

2. Remove the stock gauge, and lens from the bezel. The only item to be reused is the original front bezel.

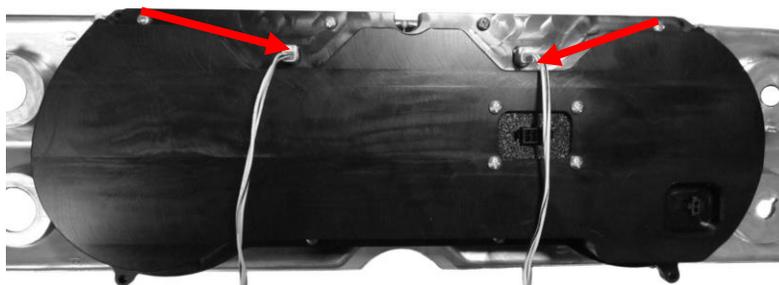

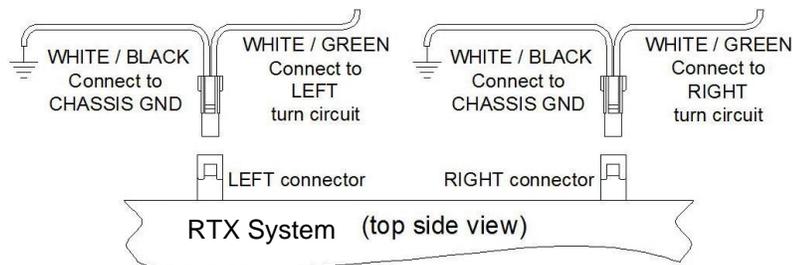

3. Secure the RTx system to the bare bezel using the supplied screws.

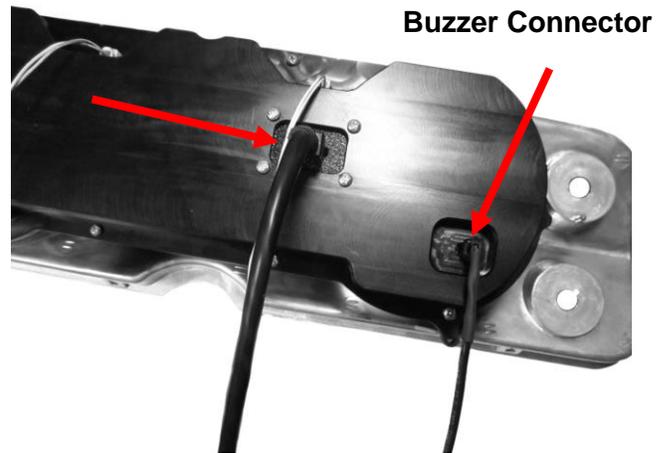

4. This system comes with the option to use two sets of turn signals in your dash: arrows located in the faceplate of your new RTx display, and arrows in your vehicle's stock turn signal locations. To use the new faceplate arrows, follow the wiring instructions for the turn signals found in the main RTx manual.

To optionally use the stock turn signal arrows, do not wire the turn signals to the RTx control box. Instead, use the two (2) provided two-wire harnesses. The harnesses plug directly into connectors on the back side of your new RTx system. Connect the wires from these harnesses to your turn signal circuits and ground as shown below. Doing this will light green LED bulbs, located in the original locations of your dash panel, when turn signals are active. Make sure to check left and right to verify they were wired correctly.

5. Connect the provided Main Harness and the Buzzer (optional for audio feedback) to the back of the RTX system.

6. Re-install the cluster into the vehicle using the factory hardware and refer to the main manual for wiring instructions to complete the RTX installation.
