RTX Display

Universal Sender Pack

Buzzer

Installation Manuals

Main Harness

Switch Assembly

Control Box

2X 3/8" Screws

2X Mounting brackets

Ford Adapter

Installation

1. Remove the stock gauge cluster from the dash and retain the factory hardware for reassembly.

2. Separate the bezel from the rest of the cluster by removing the seven screws on the backside. Retain six of these screws for reassembly.

3. With the bare bezel lying face down, fit the RTX system into place and secure it to the bezel using six original screws from disassembly.

4. Secure the angled mounting brackets to the bottom side of the RTX system using the supplied 3/8" screws while aligning the bracket to the bezel mounting hole. The brackets have a slot at each end for proper adjustment; the end with the shorter slot gets mounted to the RTX system.

End of bracket with shorter slot mounts to the RTX system using supplied 3/8" screw

Both brackets mounted to the bottom side of the RTX system

5. Connect the provided harness and the buzzer (optional for audio feedback) to the back of the RTX system.

6. Re-install the gauge cluster to the dash using the factory hardware while rechecking mounting bracket alignment. Refer to the main manual for wiring instructions to complete the RTX installation.
